Flywheel Ecology - Ecological Restoration Consulting We have decades of experience working on some of the largest and most complex ecosystem restoration projects in the Midwest, from rare and endangered ecosystems, river and stream restorations, wetland mitigation, to natural areas master planning. Along our journey, we have worked with some of the most prolific masters in the field and learned so much along the way. We have distilled this collective wealth of knowledge into a proven 4-step framework called Flywheel Ecology so that now you too can stand on the shoulders of giants. Let us share this wealth of knowledge so that you can avoid mistakes, frustration, and save massive amounts of money and time. I promise you that you will receive unmatched value and service from the first moments of our conversation, there is nothing else like us. If you are a wholesale customer or a large land manager this service is for you.

Email: Rick.Schulte@nutrien.com | Web: www.nutrien.com

CONTRACT GRAZING SERVICES

The following are goat or sheep herders who hire out their herds for brush and invasive plant management. Controlled grazing is not suited for many projects. Although animals are often insured, urban and suburban areas are often not an option for grazing. These companies can assess your situation to help determine if grazing is appropriate. These animals are in high demand, some are booked up to a year in advance.

Driftless Land Stewardship LLC located in southwest Wisconsin. They determine grazing jobs on a case-by-case basis and prefer large multi-paddock jobs where goats stay through the growing season.

Contact: Jesse Bennett and Jaye Maxfield | Address: 13761 County Hwy X, Bagley, WI 53801

Phone: (608) 778-2832 or (608) 778-6848 | Email: info@driftlesslandstewardship.com

Web: www.driftlesslandstewardship.com
